If you've ever had a construction trailer break-in, you know how frustrating it can be. One Source Security's Wireless Security System is the answer you've been looking for.

Our system is completely wireless. All you need is an outlet and a phone line. If you don't have a phone line, our optional cellular module can provide monitoring over the cellular network (where available). \*

You can move the system from trailer to trailer whenever you want.

Just mount your detectors on the wall, attach the door sensors to the doors and let us monitor the system for you—24 hours a day, 365 days a year! We never get tired!

You can also connect temperature sensors or other critical devices to the system as well.

\* - Additional equipment and monitoring costs apply
